

Mike Harris

Identity & Access Management (IAM) Analyst | Microsoft Entra ID | Cloud Security | GRC | Security+

Tampa, FL | mike_harris23@msn.com | <https://mikethecloudengineer.com> | [linkedin.com/in/mharris7](https://www.linkedin.com/in/mharris7)

Professional Summary

Security+ and AWS Certified Cloud Practitioner with 25+ years of enterprise experience spanning identity administration, compliance, technical support, governance, and operational excellence. Hands-on experience designing AWS serverless solutions and a Microsoft Entra ID enterprise IAM lab featuring cloud identities, RBAC, least-privilege access, administrative units, privileged account separation, and identity governance. Proven history conducting compliance audits, documenting controls, improving operational quality, and supporting enterprise users. Actively pursuing Microsoft SC-300 certification and seeking IAM Analyst or IAM Engineer opportunities.

Core Competencies

Identity & Access Management (IAM), Microsoft Entra ID, Azure AD, AWS IAM, RBAC, Identity Governance, Identity Administration, User Lifecycle Management (Joiner/Mover/Leaver), Administrative Units, Least Privilege, Zero Trust, MFA, Conditional Access (lab), Authentication, Authorization, NIST CSF, Compliance Auditing, Security Controls, AWS, Lambda, API Gateway, DynamoDB, Amplify, CloudWatch, GitHub Actions, CI/CD, REST APIs, PowerShell (learning), Technical Support, Incident Resolution, Documentation, Root Cause Analysis.

Professional Experience

Nielsen – Senior Field Representative (2018–Present)

- Provide enterprise technical support across multiple environments while resolving hardware, software, and mobile technology issues.
- Support technology deployments, onboarding activities, documentation, and cross-functional issue resolution.
- Maintain high customer satisfaction through effective troubleshooting and communication.

Nielsen – Market Quality Specialist (2000–2018)

- Performed compliance audits validating adherence to SOPs, confidentiality standards, and operational controls.
- Investigated data discrepancies, documented findings, supported remediation, and improved reporting accuracy.
- Produced audit documentation and governance evidence supporting business decision-making.

Cloud Security & Identity Projects

AWS Cloud Resume Challenge

- Designed and deployed a secure serverless resume platform using AWS IAM, Lambda, API Gateway, DynamoDB, Amplify, CloudWatch, GitHub Actions, REST APIs, and CI/CD.
- Configured least-privilege IAM roles and built a real-time visitor counter.

Microsoft Entra ID Enterprise IAM Lab

- Designed and implemented an enterprise IAM environment for a fictional financial services organization.
- Created cloud identities, department and role-based security groups, manager relationships, and administrative units.
- Implemented RBAC, privileged account separation, identity inventory, access matrix, and governance documentation aligned with least-privilege and Zero Trust principles.
- Established standardized naming conventions and enterprise identity administration processes.

Certifications

- CompTIA Security+
- AWS Certified Cloud Practitioner
- Microsoft SC-300 (In Progress)

Education

Bachelor of Science – Project Management, ITT Technical Institute

Associate of Science – Electronic Engineering, ITT Technical Institute

Professional Development

Building a portfolio of Microsoft Entra ID, Active Directory, SailPoint, Okta, SCIM, SAML, OAuth, PowerShell, Conditional Access, Identity Governance, and Privileged Identity Management projects.
